

SUMMARY

Detail-oriented Frontend Engineer with 4+ years of experience in building scalable, high-performance, and responsive web applications using React.js, JavaScript (ES6+), Typescript, Redux Toolkit, and Tailwind CSS. Proven success in improving UI load times and user satisfaction through performance optimization, testing, and reusable component architecture. Strong grasp of computer science fundamentals (DSA, OOP), and passionate about crafting intuitive and accessible user experiences. Collaborative team player with an ownership mindset and problem-solving attitude. Experienced in developing and maintaining web platforms for e-commerce clients, translating design systems and prototypes into scalable, production-ready frontend solutions and passionate about translating design systems into scalable frontend solutions.

Skills

Languages & Frameworks: JavaScript (ES6+), React.js (v17/18), HTML5, CSS, SCSS, Tailwind CSS, TypeScript, Optimisation State Management: Redux Toolkit, Context API
UI/UX: Responsive Design, Server-Side Rendering (SSR) Basics, Component-Based Architecture, Custom Hooks
Testing & Quality: Jest, React Testing Library
API Integration: REST, GraphQL
Other Tools & Technologies: npm, Firebase, Axios, Netlify, Figma (for UI handoff), Agile/Scrum workflows, Material UI, Custom hooks
Performance Optimization: Lazy loading, Tree shaking, Code splitting, Lighthouse tuning
Application Resiliency, Security Best Practices
CI/CD experience in code deployment or Git workflows

Professional Experience

Front-End Developer

Aug '21 - Present

Fusion Technosoft Pvt Ltd

Bengaluru

- Developed and maintained e-commerce applications for clients including Big Bazaar, Blue Star and Silver Heal.
- Built responsive user-friendly interfaces using React.js, Redux-Thunk, and Tailwind CSS.
- Integrated REST APIs and handled async data flows using Axios and Async/Await, GraphQL queries/mutations for improved API efficiency. Integrated React frontends with Node.js/GraphQL services, contributing to system design and debugging in large-scale environments.
- Partnered with UX/UI teams to translate wireframes from Figma into high-quality, responsive code.
- Delivered features end-to-end in Agile sprints, collaborating with designers, QA, and backend teams to ensure seamless product delivery and code quality
- Implemented Jest and React Testing Library for Testing
- Familiar with Git-based workflows and CI/CD pipelines for deployment using tools like GitHub Actions or Netlify.

Personal Projects

Netflix clone

Netflix clone

- Netflix-inspired UI using React.js and TMDB API to fetch movie content.
- Implemented API integration for movie listings and ensured cross device compatibility.
- Designed a fully responsive layout with modern UI components.

Zomato Clone

Zomato Clone

- Created a fully functional restaurant discovery platform using React.js.
- Implemented API integration for restaurant listings and dynamic filtering and Ensured cross-device compatibility

Education

Bachelor Of Engineering in Computer Science
CMR Institute of Technology

Bangalore-2018
